65 U.S. ton | 55 metric ton Hydraulic Truck Crane

- 36.7’-115’ Full Power Formed Boom
- 28.5’ – 51’ Two Piece Offset Fly
- 171’ Maximum Tip Height
- 18,700 lbs Maximum Counterweight
- 4-Piece modular design
- Cummins L9 8.9L Diesel Engine
- EPA 2021 On-Highway Certification
- 370bhp
- 1,250 ft-lb peak torque
This lean and mean machine is built to meet the toughest road laws.

- Drives like an automatic and has the power of a manual transmission
- Air ride suspension on front and rear axle
- Travels with full counterweight

Cruise in one load to your next job site!

- Speeds up to 60.6 mph (97.6 km/hr) on the highway, unmatched in the industry today
- Move it on the job site at 1.3 mph (2.0 km/hr) creep speed at idle for maximum maneuverability
- Automated transmission (no clutch pedal)
  12 speeds forward, 2-speeds reverse with two modes of operation: fully automatic and semi-automatic
- Cruise control
- Three-stage engine compression brake
- Ether injection system - optional
Carrier-mounted outrigger controls, located on each side of the carrier, include an engine throttle-up switch for fast outrigger deployment. For fine level adjusting of the carrier, throttle can be taken down to idle.

Folding viewing mirror for travel

Optional integrated air conditioning

Swing camera

Optional hoist drum cable follower and optional third wrap indicators

Guardrails

Rear view camera

Stow ’n Go outrigger pontoons are quickly and easily stored and secured for travel, eliminating the need to remove the pontoon each time the crane moves. Pontoon storage space is also available on rear fenders and side access ladders.

Powerful & responsive piston winch

- Two-speed motor with automatic brake
- Grooved drums minimize rope harmonic motion and improve spooling
- Optional auxiliary two-speed winch

The Confined Area Lifting Capacities (CALC) system provides three outrigger positions:
- full retraction
- intermediate extension
- full extension

Outrigger pins eliminate guesswork by automatically positioning outriggers at midpoint position.
Superior capacities and extension ranges

New 4-section full power boom with attachment flexibility

- 36.75’ to 115’ (11.2 - 35 m)
- 171’ (52.2 m) maximum tip height with full attachment
**Hammerhead boom** nose allows the operator to work at high boom angles without fouling wire rope.

**Improved capacities**
- Base rating increased to 65 US Tons
- Increased total counterweight to 18,400lbs

**Optional 28.5' to 51' (8.7 - 15.5m) two-piece bi-fold lattice fly**
- Erection of two-piece (bi-fold) lattice fly is a one-person operation — easy to erect & stow
- Exclusive design reduces side deflection when lifting load
- Also available: One-piece 28.5' (8.7 m) lattice fly with lugs to allow addition of second section
- Attachments offset to 2°, 20° and 40°

Lightweight **nylon head sheaves** reduce weight and increase capacity.

Quick **reeve head machinery** for fast, easy line change

Optional **auxiliary lifting sheave** requires only one person to install and does not need to be removed when the attachment is erected, regardless of offset.

**Tip-Heights – Optional On-board Lattice Fly**
- 28.5-51 ft (8.7-15.5m) two piece bi-fold on-board lattice attachment with 2°, 20°, and 40° manual offsets

**Improved Capacities**
- Base rating increased to 65 US tons
- Increased total counterweight to 18,700 lbs

**All new boom design**
- 115' fully extended length — 5' longer than predecessor
- Formed boom construction
- Greaseless boom technology
- Reduced maintenance and upkeep
Comfortable carrier cab provides high visibility

- Ultra-Cab with fiberglass construction
- Dash-mounted comprehensive instrumentation with backlit gauges
- Roll up/down door window provides excellent ventilation
- Fully adjustable air ride fabric seat
- Suspended pedals
- Right sideview and backup cameras

Air-ride suspension front and rear provides a smooth ride and precise handling. Optional air-ride lift system holds the rear suspension retracted while the crane is on outriggers.

Counterweight transfer removal controls located on each side of the upper structure.

Innovative two-part paint coating technology, coupled with a pre-assembly paint process, provides the finest quality coating system available today.

Hydraulic counterweight transfer/removal system

- Easily positions counterweight on carrier deck for efficient axle load distribution.
- Modular counterweights offer up to four lifting combinations.

There are three standard locking storage boxes with an optional fourth.
Aluminum wheels and radial tires with chrome and stainless wheel accents

The operator’s cab is roomier and quieter than traditional cabs

- Six-way adjustable fabric seat with lift-up armrest (which deactivates control functions when raised)
- Armrest mounted, responsive dual axis hydraulic controllers
- Sight bubble level mounted on side console
- Ducted air through automotive-style directional vents
- Sliding right side, rear windows and swing-up roof window
- Single foot pedal boom telescope control
- Automotive-style windshield
- Corner-post-mounted, backlit gauges
- Large, sweeping electric wipers
- Dashless design
- Engine-dependant warm water heating with defroster
- Winch and right side swing view cameras
- Bluetooth™ AM/FM radio

Superior accessibility

Access to the operator’s cab and engine compartment is superb with strategically located ladders and steps. The pull-out CabWalk™ slides out from its secured travel position underneath the operator’s cab to give the operator a platform to stand on for easy entry and exit from the cab.

Telematics. You own the data!

Cellular-based data logging and monitoring system that provides:
- Viewing options for sharing data with distributor and Link-Belt
- Location and operational settings
- Monitor routine maintenance intervals
- Crane and engine monitoring
- Diagnostic and fault codes
Link-Belt Construction Equipment Company is a leader in the design, manufacture and sales of telescopic and lattice boom cranes with headquarters and manufacturing facilities in Lexington, Kentucky, USA. Link-Belt is committed to the manufacture and service of high quality products that satisfy customers worldwide.

Towards that end, Link-Belt has pursued a strategy of growth and investment. It has moved aggressively to seize more global market share by producing a broader range of products and strengthening distribution and personnel around the globe.

Link-Belt is also home to a family of passionate professionals with a legacy of innovation and cutting-edge technology spanning over 140 years. These professionals, in a 740,000 sq. ft. (68,748 m²) manufacturing facility and with a culture of continuous innovation, have pushed Link-Belt to be the most modern crane manufacturer in North America.

Your crane investment is always protected... with your Link-Belt distributor.

When you invest in a Link-Belt crane, you invest in a legacy of outstanding customer support dating back to 1874. The ultimate value of a machine begins with state-of-the-art design and quality manufacturing, but it is the excellent Link-Belt distributor product support that determines its long term value. This philosophy has earned Link-Belt cranes the enviable position of traditionally commanding some of the highest resale prices in the industry.

Link-Belt Preferred

As a member of Link-Belt Cranes user’s group, you will have access to:

- A comprehensive online library of parts, service & operator manuals for YOUR crane
- Interactive, live groundbearing calculations for YOUR crane
- Plus a vast array of information on new products, services and special offerings
- Online access to recommended spare parts lists, filter, lube and key lists plus maintenance information and more
- No annual fee or charges to access your crane information
